SKILLS

React: 1 year of experience building dynamic user interfaces using React and Material UI.

JavaScript: Strong understanding of core concepts, including asynchronous programming and event-handling.

Material UI: Proficient in using Material UI components to create visually appealing and user-friendly websites.

Progressive Web App: Knowledge of PWA development, including service workers and caching strategies.

Git and GitHub: Experienced in using Git for version control and collaboration, and GitHub for project management and sharing.

Redux & Recoil: Experience in managing state and data flow in React applications using for handling shared state.

EDUCATION

BACHELOR OF TECHNOLOGY
MEDICAPS UNIVERSITY | 2016 - 2020

HIGHER SECONDARY
K.K.S.N AMARKANTAK | 2012 - 2015

MATRICULATION
ST. JOSEPH'S CONVENT SCHOOL | 2002-2012

INTRESTS

Passionate about learning new technologies and programming languages, with a particular interest in new optimized technologies. Enjoys creating websites and applications in my free time, as well as exploring new tools and techniques to improve my coding skills.

ACCOMPLISHMENTS

- Did in-house PATENT project in college on smart helmet using RF technology, which was awarded best project in second international conference on green energy for substantial development-2020 (ICGESD-20) held in government polytechnic college, Nagpur.
- Active participant of an NGO, Rang De Zindagi which provides support to educate underprivileged children.

WORK EXPERIENCE

WEB DEVELOPER

SYNERGYTOP, INDORE, JAN 2022 - PRESENT

Worked as a member of a dynamic development team at Synergytop, delivering high-quality websites for clients. Developed various features, such as custom components, animations, and responsive designs to enhance the user experience.

Collaborated with designers and project managers to ensure projects were completed on time and met client requirements. Implemented best practices in coding and software development, such as version control and testing, to ensure stability and security.

Contributed to the company's technical knowledge base by sharing my skills and experience.

RELEVANT PROJECTS

- EnergyBy5

Energyby5 is a project aimed at revolutionizing the way energy is consumed and managed. The project leverages the latest technologies and tools to provide a comprehensive solution for individuals and businesses to manage their energy consumption. The Energyby5 platform is built using the latest web technologies including JavaScript, React, and Node.js to provide a fast, responsive, and user-friendly experience. The platform leverages Material UI for a modern and elegant design that is easy to navigate.

- Nomad Grab

Responsible for front-end development of a website built with ReactJS and Material UI. Developed custom components, integrated APIs, and ensured the website was optimized for performance and accessibility. https://nomadgrab.com/

- Kunneckt

Worked as the front-end developer for a platform that offered online courses. Used ReactJS and Syncfusion to create dynamic and engaging user interfaces. Collaborated with the back-end team to ensure seamless integration of data and functionality.

- Synth Deep

Developed the UI for a machine learning platform using ReactJS and compatible libraries. Ensured the website was fast, intuitive, and easy to use, while also implementing best practices in coding and security.
